MACHINES & TECHNOLOGY

Driven to INNOVATE

INTERVIEW: **Kelly Knutson**, CEO at Colorado-based Isolate Extraction Systems Inc., an industry leader in the development and production of next-generation supercritical extraction technology.

Heavy Duty: How important is heavy-duty manufacturing to your business?
KK: Absolutely. It's very important to us. We believe that our equipment is built to last. We have a long track record of providing heavy-duty equipment to our customers. We're not just selling equipment; we're selling a solution. We're providing a complete turnkey solution, from design to installation. We're providing a solution that's built to last. We're providing a solution that's built to last. We're providing a solution that's built to last.

FF: How do you see the industry changing in the next five years?
KK: I see a lot of consolidation. I see a lot of companies that are not built to last. I see a lot of companies that are not built to last. I see a lot of companies that are not built to last. I see a lot of companies that are not built to last.

AUSTRALIA
Setting the table
Early entrants poised to cash in on newly opened market

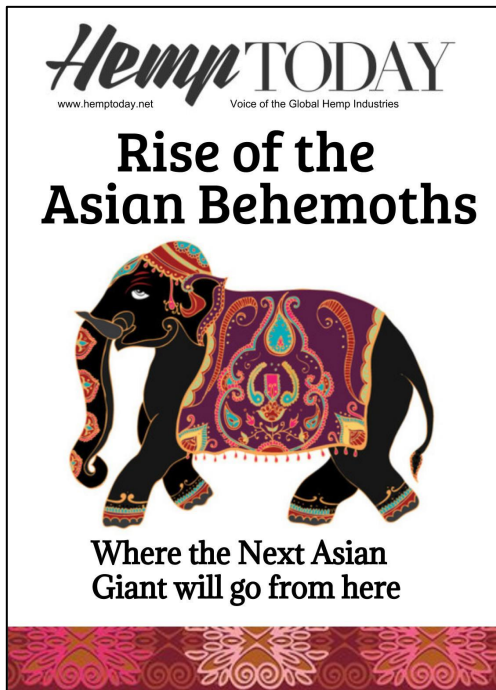

Customer market poised: Seoham and the Australian market is slowly primed, with consumers showing recognition and positive attitudes toward hemp food products – such things as hemp seeds, hemp oil and hemp protein.

“This decision will also contribute significantly toward more sustainable farming in Australia.”
—Paul Robinson, CEO

Getting going down under
Four of six Australian states have introduced hemp programs: New South Wales, Victoria, Queensland and Tasmania.

NZ sees economic of hemp: While less developed, New Zealand has long programs in place to help its farmers and processors. Mark McInnes, of the New Zealand Hemp Industry Association, says the high-quality, nutritious potential of hemp plants is ripe for expansion as available from the new stable crop and oil farmers seek uses for the protein-rich and fiber-rich whole plant, not just the seed. “McInnes said: “The industry could be much bigger if we include the food and beverage produced from the 20% of the crop left as stalked seed and flowering tops.”

The advertisement is set against a vibrant orange background with a subtle pattern of hexagons and molecular structures. At the top left is the IES logo, which includes the text 'ISOLATE EXTRACTION SYSTEMS INC.' and 'PURE EXTRACTION'. The main headline reads 'IES WORKING TO DESIGN AND MANUFACTURE THE FINEST EXTRACTION SYSTEMS.' Below this, there is a block of smaller text: 'IES IS COMMITTED TO DEVELOPING STATE OF THE ART TECHNOLOGY AND PROCEDURES WITH THE GOAL OF PRODUING THE MOST EFFICIENT EQUIPMENT IN RESPONSE TO MARKET SPECIFIC REQUIREMENTS AND USES OF HEMP. ALL OF OUR EQUIPMENT IS BUILT IN accordance WITH PROFESSIONAL QUALITY DESIGN STANDARDS. THIS SUPPORTS EFFICIENT CONSISTENT AND REPEATABLE PRODUCTION OF HIGHLY PURE EXTRACTS. THE BASIS FOR CREATING PROFESSIONAL LEVELING LABORATORY QUAL EQUIPMENT IS CLARIFIED IN SCIENCE. MANUFACTURED WITH SUPERIOR QUALITY MATERIALS. CONTACT US AT: 708-542-7000 WWW.ISOLATEEXTRACTION.COM'. The central focus is a photograph of a complex industrial extraction system with several vertical stainless steel columns and a control panel. At the bottom, the text 'Isolate extraction systems inc.' is visible.

Farm Bill: Congress recognized and acknowledged the need for research and development to investigate hemp-derived products including CBD, and gave extensive discretion to create pilot programs to strengthen that research. They called the USDA to "accurately estimate the yield, the yield and development program to allow them... to experiment with commercial research and development of industrial hemp, including seed and derivatives."

CBD advocates have generally suggested a low dose of CBD in a medicinal, prescription-only context, but what does CBD do when products with lower percentages to be sold on the open market over the counter as food or health supplements.

WATER RIGHTS: Could hemp be the answer to some of our water woes? Anecdotal reports of growers in Colorado describe farmers taking up acres and leaving fields to prevent evaporating with water. In the long run, says *Grow 220's* Haines, we need a bill in 2019. If the products hemp farmers use in fields will water retention for crops, by providing nutrients to hemp as an agricultural product. However the U.S. Bureau of Reclamation,

Where's the money?

Flourishes per acre, Canada & USA combined (seed, raw CBD)

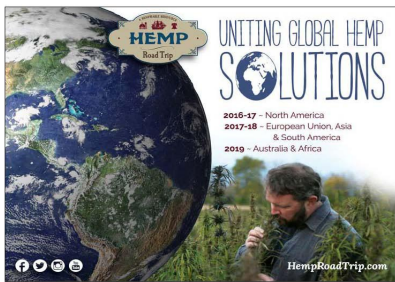

Category	Flourishes per acre
USA	100,000
Canada	150,000
USA + Canada	250,000
USA + Canada (seed)	100,000
USA + Canada (raw CBD)	150,000

INTERNATIONAL DEALS: As the CBD market begins to truly open, Canadian and Chinese firms are vying to make moves. Florida Hemp Co. of Vancouver, British Columbia recently made a distribution deal with Green East Cannabis in Baja Mexico. California-based cannabis producer Pharmeda's CBD-based food and drinks are being the leader in 550 California dispensaries. SHED Group of Beijing and King Peak Brands of Chengde, China, have already grown under this program. A CBD isolate extraction plant the planned 50,000-sq-ft facility will process hemp flowers for pharmaceutical products. Else for clothing and made for food, said *Earth Today's* King. The company projects it will employ 100 workers that a planned 100-acre hemp growing and processing operation in Canada will produce. Currently, north-western Kentucky looks like the most likely location for a hemp isolate plant. Colorado already has 100 installations in 47 U.S. states.

the nation's largest water supplier, doesn't allow its reservoir to be used for hemp irrigation, and in other states growers report having their water turned off.

It's 4:46. The Lockheed Martin Water Rights Act aims to solve these problems and is currently under congressional review. Rep. Steve Daines (R-Montana) introduced the bill in Oct. 2017. Farmers across the country are also able to grow industrial hemp, an age-old crop with broader potential, said *Flax*.
